“

I'm really pleased and very happy with the style of my stairlift. I'm over the moon that I don't have to walk up and down the stairs anymore, I'm over the moon with the whole thing.

06

# ADVANCED SWIVEL AND LEVELLING TECHNOLOGY

OVIT technology enables the stairlift to rotate and stay perfectly level while in motion. By rotating during travel, you're always in the safest and most comfortable position.

1

The seat is always in the correct position to The swivels as it travels, this means that getting on and end of the staircase is quick and easy. At the top of the staircase the seat can rotate away from the open staircase, allowing a safe exit from the seat.geton and off safely off the lift at either

2

Constantly working to save you time and provide safety and comfort

Technology operates while the lift is moving. Therefore you avoid additional stops and swivel movements at the beginning, during and at the end of the ride. This saves time and provides additional safety and moves in one. Comfort. The lift really

3

Internal or external rail on the narrowest and steepest stairs

Even in cases where the staircase is narrow and steep, the Flow2 can be installed closer to the step and on either side of the staircase. Your stair-lift will be less obtrusive and your staircase remains accessible for other family members in your home.

4

Unique technology that can only be found with the

Your well-being is important to us – when you choose technology the footrest swivels with the seat ensuring your legs and feet remain in a natural and comfortable position, relieving any additional strain on your joints.

**TECHNOLOGY ALLOWS THE RAIL  
TO BE KEPT AS LOW AS 62MM  
ON A WIDE VARIETY OF STAIR-  
CASE STYLES AND CONFIGURA-  
TIONS.**

**Standard Drop Nose** The standard drop nose is the perfect solution if there is an obstruction such as a door near to the bottom of the stairs. The drop nose requires just 175 mm of space from the bottom step.

**Vertical 'Short-Start' Drop Nose** Where space is even tighter at the bottom the 'short-start' drop nose can be installed, needing only 100 mm of space from the bottom step.

**Horizontal Overrun** Where you have extra space at the bottom of the stairs the horizontal overrun allows the chair to be parked away from the bottom step.

**Parking Curve** A parking curve allows the chair to be parked neatly out of the way of the stairs.
